Product Description

Both the Compact MDU 3 mm simplex cable and the Rugged Indoor MDU 5 mm simplex cable meet ICEA-730 Draft specification for MDU cables. The 3 mm is ideal for low-stress installations where space is a premium. The 5 mm is more robust and can handle installation tensions as high as 100 pounds. Both cables are available with G.657.A2 or G.657.B3 compliant bend resistant single mode fiber, preventing light loss even under tight bends.

Applications

- Multi-Dwelling Units (MDU)
- Horizontal (non-plenum) or riser spaces
- Optical entrance facility to end-user
- Passive optical networks

Features

- ICEA S-115-730-2011 (Draft) and ICEA-596 compliant
- Available with G.657.A2 or G.657.B3 single mode fiber
- Riser rated
- Feet/meter length marking

Benefits

- Insures reliable installation and performance
- Assures low attenuation loss even under installation stresses, such as tight bends and cable stapling
- Meets fire safety requirements for MDUs
- No need for length unit conversion
